

We just looked at a number of ways to help your personal productivity and energy levels as well as getting things done with the same or more quality in less time.

This exercise helps you ensure you put this new knowledge into practice.

1. List all of your activities completed in a typical work week. Be comprehensive, everything from the biggest to the smallest task.

☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____
☐	_____	☐	_____	☐	_____

2. Next, we will group these activities. Review your answer to part one and now list the different “categories” of tasks which they can be sorted into (e.g. data input, writing, phone calls, etc.).

☐	Group 1	☐	Group 6
☐	Group 2	☐	Group 7
☐	Group 3	☐	Group 8
☐	Group 4	☐	Group 9
☐	Group 5	☐	Group 10

3. Put your activities into groups. Look back on Part 1 and place a number next to each activity, which shows the category it belongs to.

4. Attempt doing grouped activities together. Doing them in sequence boosts efficiency by helping us focus more deeply and minimize task switching (each time we switch, we suffer from attentional residue: part of our focus is still on the previous task). How specifically will you ensure these tasks are done together?

5. Let's calibrate your tasks to your energy level.

High-potential hours (energy at its highest) are when we excel at high-focus, logic-based tasks like planning and learning.

Low energy hours are for creative tasks and performing adequately at less demanding work like timesheets and entering expenses. Meetings are a good idea during low energy hours as being around others is naturally energy giving.

Look at part 1 and based on the energy involved and task difficulty decide which tasks you should attempt during low potential hours (place an L next to the task) or high potential hours (place an H next to the task).

6. Consider the groups next to which you placed the letter "L". You may have done some of these activities during your high potential hours over the last week. What will you do differently in the future to stop yourself from spending time on these activities during high-potential hours?
