

Directions

For three days over the next week, I would like you to track your energy throughout the day.

This will help you assess whether you are more of an early bird, midday bear or night owl and then as best as possible you can adapt your energy levels to the tasks which you need to complete.

At each of the times below please rank your level of energy between 1 (very low) and 10 (tip top).

If you are a stats geek then you may find it fun to track this on an excel document.

How much energy do you have right now?

(1 = Very low; 10 = Tip top)
