

At its core, creativity is all about coming up with solutions to issues or problems. Or creating a need people didn't even realise they had, like the smartphone which combined the mp3 music player and a phone into one. Let's get started:

- 1. What project are you currently working on** that you feel you could do with some more creative insights on?

- 2. Next, let's review the information you're currently consuming.** Please be as detailed and specific as you can in answering the questions below.

What websites do you commonly check during work?

☐		☐	
☐		☐	
☐		☐	

What websites do you commonly check outside of work?

☐		☐	
☐		☐	
☐		☐	

What radio shows and podcasts do you commonly listen to?

☐		☐	
☐		☐	
☐		☐	

What movies and TV shows do you commonly watch?

☐		☐	
☐		☐	
☐		☐	

What books or magazines do you read?

☐	_____
☐	_____
☐	_____

☐	_____
☐	_____
☐	_____

What apps do you commonly use?

☐	_____
☐	_____
☐	_____

☐	_____
☐	_____
☐	_____

3. Review all the information sources you have listed above and put a tick beside it if it is contributing to your thinking on this project.

4. Review the items with no tick and then ask yourself, "if it's not contributing to my most important project is it at least contributing to my wellness?"

5. Items with no ticks should be eliminated.

6. Rate your knowledge of the subject area of your project out of 100.

1

Very
little

Your number

100

Absolutely
everything

7. If less than 70, ask yourself: "what resources can I use to help me upskill in the area and improve my level of thinking on it?"

What websites?

What books or magazines?

What TV shows or movies?

Who can you talk with?

What radio programs, podcasts, or audiobooks?

- 8. If greater than 70, ask yourself:** *"is there another field that could offer me a valuable and different outlook on what I am currently working on?"*

An example might be a politician reading up on military strategy or a sports person reading up on the Toyota model of continuous improvement.

- 9.** What can you do to make accessing this new and important information more easily accessible? E.g. buy an audiobook on Audible to consume during your commute.

- 10.** When looking at insights from a different field, think about this:

- How is this similar to what you are working on?
- How can you harness these insights in your own field and problem solving?
