

Fuel To Perform With Nutrition & Hydration

Reconnect With Your Food

- Eating mindfully can actually help to improve digestion and reduce unnecessary eating. To begin:
- Consider having one meal a week on your own and eat slower (chew more).
- Start the journey with a mindful tea (really feel the sensation of the warm mug in your hands and the nice and soothing liquid going down your throat).
- Don't eat and... Eat and send emails, eat and read memos – this can lead to unnecessary stress.
- Take the first few minutes of a nice meal to appreciate those who prepared it and recognise calmly all the wonderful flavours on offer.
